Profile

Experienced Web Developer with design flair and entrepreneurial tendencies. Competences ranging from Fullstack Development to Product Manager to company owner. From designing and building web applications to on-boarding, talking to customers and scaling developer team.

Having a passion for programming, enthusiasm for solving problems and being a fast learner ensures continuous improvement of the solutions I'm contributing to. I'm eager to improve and happy to share knowledge.

I've been working for myself, as a co-founder of a startup, for other startups, as a co-founder of a web agency, and as a full-time developer at both web- and advertising agencies.

I'm a dog owner, father, and husband from Skanderborg, Denmark. I'm relaxing by playing music, reading books or hearing podcasts. The last two very much while walking that previously mentioned stubborn bulldog.

Experience
